

BAIDOO BONSOE SENIOR HIGH TECHNICAL SCHOOL
DEPARTMENT OF ICT – FORM 2, END OF FIRST SEMESTER EXAM, 2026
MARKING SCHEME

SECTION A

MULTIPLE CHOICE (Questions 1 – 20)

- | | |
|-------|-------|
| 1. B | 11. B |
| 2. D | 12. C |
| 3. C | 13. A |
| 4. B | 14. D |
| 5. A | 15. B |
| 6. C | 16. D |
| 7. B | 17. B |
| 8. C | 18. C |
| 9. D | 19. B |
| 10. A | 20. D |

FILL IN THE BLANK (Questions 21–30)

- 21. Function name
- 22. #DIV/0!
- 23. AutoFill (Fill Handle)
- 24. RFID (Radio Frequency Identification)
- 25. Ascending
- 26. Pivot
- 27. Name Box
- 28. Cells / Workbook
- 29. Active
- 30. #DIV/0!

SECTION B – STRUCTURED QUESTIONS

Question 1 – Label the Parts of the Excel Template

Label	Part Name
a	Quick Access toolbar
b	Ribbon
c	Name Box

d	Active cell
e	Cell
f	Row
g	Sheet Tabs
h	Status Bar
i	Column
j	Horizontal Scrollbar
k	Vertical Scrollbar
L	Formula Bar

Question 2

(a) Difference between Workbook and Worksheet

A worksheet is a collection of cells while a workbook is a collection of worksheets.

(b) Five Benefits of Emerging Technology in Education

- **Personalized Learning:** AI-powered tools adapt lessons to individual students' pace, style, and ability level, improving understanding.
- **Access to Information:** The internet and digital libraries give students instant access to vast educational resources from anywhere in the world.
- **Interactive and Engaging Learning:** Technologies like Virtual Reality (VR) and Augmented Reality (AR) create immersive, hands-on learning experiences.
- **Online/Distance Learning:** Students can attend classes and complete coursework from remote areas via e-learning platforms, removing geographical barriers.
- **Improved Collaboration:** Digital tools such as Google Classroom and Microsoft Teams enable students and teachers to collaborate and share work in real time.

(c) Five Examples of Spreadsheet Software

- Microsoft Excel
- Google Sheets
- LibreOffice Calc
- Apple Numbers
- WPS Spreadsheet (Kingsoft Office)

Question 3

(a) Difference Absolute Cell Reference and Relative Cell Reference

Relative Cell Reference is a cell reference that automatically adjusts or changes when a formula is copied or moved to another cell. For example, if the formula $=A1+B1$ is in cell C1 and it is copied to C2, the formula changes to $=A2+B2$. The reference moves relative to the new position of the formula while Absolute Cell Reference is a cell reference that stays fixed and does NOT change when a formula is copied or moved to another location. It is identified by the dollar sign (\$) placed before the column letter and/or row number (e.g., \$A\$1). For example, if $=\$A\$1+B1$ is copied from C1 to C2, the \$A\$1 part remains unchanged while B1 becomes B2.

(b) Five Importances of Spreadsheet

- Data Organization: Spreadsheets help store and organize large amounts of data in a clear, structured, tabular format.
- Automatic Calculations: Built-in formulas and functions (SUM, AVERAGE, COUNT) allow spreadsheets to perform complex calculations instantly and accurately.
- Data Analysis: Spreadsheets support sorting, filtering, and pivot tables, enabling users to analyze and interpret data efficiently.
- Charts and Graphs: Spreadsheets can generate visual charts and graphs from data to support decision-making and presentations.
- Record Keeping and Budgeting: Businesses and individuals use spreadsheets to maintain accurate financial records, payrolls, and budgets.

(c) Five Examples of Word Processing Software

- Microsoft Word
- Google Docs
- LibreOffice Writer
- Apple Pages
- WordPerfect

Question 4

(a) Difference Between 'Save' and 'Save As'

The Save command updates the current document by overwriting the existing file with the latest changes. It saves to the same file name and location that was previously set. It is used when you want to quickly save progress to the same file without creating a new one while the Save As command allows the user to save a document with a new file name, in a different folder/location, or in a different file format (e.g., saving a .docx as a .pdf). It creates a brand-new copy of the file without overwriting the original. It is used when saving for the first time, creating a backup copy, or saving in a different format.

(b) Five Disadvantages of Online Learning

- **Limited Face-to-Face Interaction:** Students miss the personal connection with teachers and classmates, which can reduce motivation and support.
- **Technical Problems:** Poor internet connectivity, power outages, or hardware failures can interrupt lessons and delay learning progress.
- **Requires Self-Discipline:** Online learners must be highly self-motivated and organized since there is less direct supervision compared to a classroom setting.
- **Insufficient Practical Training:** Subjects requiring laboratory work, experiments, or physical demonstrations are difficult or impossible to conduct online.
- **Screen Fatigue and Health Risks:** Long hours in front of screens can lead to eye strain, headaches, poor posture, and reduced concentration.

(c) Five Digital Devices / Technologies

- Smartphone
- Laptop/Personal Computer
- Tablet (e.g., iPad)
- Smart Wearables (e.g., Smartwatch)
- Digital Camera
