

BAIDOO BONSOE SENIOR HIGH TECHNICAL SCHOOL
FORM ONE, SEMESTER ONE
FACILITATOR NAME: BAAH EZEKIEL

Learning Plan							
Subject	<i>Information & Communications Technology</i>	Week	<i>1</i>	Duration	<i>120 minutes</i>	Form	<i>1</i>
Week Ending	14 th November 2025						
Strand	<i>ICTs in the Society</i>	Sub-Strand	<i>Organizing, Managing and Presenting Information Using Essential Productivity Tools</i>				
Content Standard	<i>Demonstrate knowledge and understanding of the use of various computing tools to create multimedia documents.</i>						
Learning Outcome(s)	<i>Create multimedia documents using appropriate computing tools</i>						
Learning Indicator(s)	<i>1. Describe software, hardware, and other computing features needed to create a document.</i> <i>2. Create, Edit and Format text and paragraphs using desktop/online computing tools</i>						
Essential Question(s)	▪ <i>How will you explain computer hardware? Understanding</i> ▪ <i>How are the categories of hardware related? (Understanding, analyze,)</i> ▪ <i>How do you use these hardware types in creating a document? (Understanding, analyze, evaluate)</i> ▪ <i>How are the types of software related? (evaluate)</i> ▪ <i>In what ways can I integrate cross cutting theme GESI SEL national values in teaching components of the computer: Hardware and Software?</i>						
Pedagogical Strategies	<i>Talk for Learning;</i> <i>Experiential learning</i> <i>Questioning</i> <i>Brainstorming</i>						
Teaching & Learning Resources	<i>Laptop</i> <i>Hard Disk Drive</i> <i>System Unit</i> <i>Mouse</i> <i>Keyboard</i>						

	Pen drive
Key Notes on Differentiation	
i. Learning Task: • The teacher should start the lesson by grouping the learners taking into consideration GESI, SEL, and other cross-cutting issues, and have an open class discussion where learners brainstorm about the computer and what it requires to work efficiently • Teachers can ask learners in their groups to individually think-write-share with their group members the definition of a computer and agree on one definition. Teachers can then ask each group to present their definition • Teachers should task learners in their groups to brainstorm the purpose of computers in everyday life and ask each group to share their write-up with the class using tell-it-all • Teachers can ask learners in their groups to individually write with their group members the definition of computer hardware and software based on the outcome of the purposes of a computer. Teachers can then ask each group to present their definition • Using a projector, teachers project a designed puzzle of names of hardware and software components and ask learners to write out words from the puzzle. Teachers ask members in each group to read out their words and ask other groups to write computer related words down. Teachers ask each group to regroup their written words under hardware and software components of a computer and present their responses to the class • Teachers tasked each group to discuss the categories of hardware and software components with examples and present their results with the class. Teachers guide the whole class to draw the relations between hardware and software components, etc. ii. Pedagogical Exemplars: • Think Pair Share: Using mixed-ability/mixed gender groups, learners think, write and discuss the definition of a computer and its purposes, software and hardware components addressing inclusivity and equity. For example, input devices should be discussed to address accessibility issues for learners with disabilities such as visual impairment, dyslexia, and dysgraphia • Tell-it-all: In small groupings, (ability, language, background, gender, etc.), learners list some hardware and software related words from a puzzle and group the words into hardware and software components. One group gives examples of hardware from their write up. Other groups repeat examples given by others and add their examples. This activity is repeated for examples of software as well • Ink-Pair-Share: In pairs, learners write the relationship between hardware and software components using pen and paper and exchange their write ups with their colleagues. The teachers randomly select a few learners to read what colleagues wrote. Teacher then guides learners to draw a clear relationship between software and hardware components of a computer system, etc. iii. Key Assessments (DoK): • Level 1: What is a computer?	

• <i>Level 2: The external and internal devices and equipment that enable you to perform major functions such as input, output, storage, communication, processing, and more is known as.....</i> • <i>Level 3: Distinguish between application software and systems software</i> • <i>Level 4: It is the hardware part of the computer that makes the computer intelligent and not the software. True or False. (Explain your answer), etc.</i> • <i>Level: Enter twenty (20) words into a text editing software, using keyboard or any other input device.</i>	
Keywords	<i>Software, Hardware, word processing application software input, processing, output, storage, communication, Liveware</i>

Lesson 1 Focal Areas: 1. Computer hardware needed to create a document.	
Main Lesson drawing on Concepts, Skills and Competencies to reinforce as in the Subject Teacher Manual	
<i>Teacher Activity</i>	<i>Learner Activity</i>
<u>Starter Activity (10 minutes)</u> <i>Brainstorming:</i> ▪ <i>An electric train is moving from Tamale (in the north) to Accra (in the south). What will be the direction of the smoke?</i> <i>(understanding)</i> <i>Teacher brainstorms with learners to define and identify</i> • <i>The key points in defining computer software and hardware. Use a concept map to link the key points</i> • <i>What learners use to place calls at home.</i> • <i>The type of applications on mobile phones used to perform a task.</i>	
<u>Introductory Activity (15minutes)</u> I. <i>In small groupings let learners List at least 10 hardware components and categorize them into input, processing, output and storage for large group discussion.</i> <u>Activity 1 (15 minutes)</u> I. <i>engage learners in an interactive discussion and use questioning to explain that without system</i>	<u>Introductory Activity (15minutes)</u> I. <i>State and classify 10 hardware components into input, processing, output and storage for large group discussion.</i> <u>Activity 1</u> I. <i>engage in class discussion and answer questions to gain understanding of how system</i>

<i>software a hardware will have no function and that system software is required as a platform for other software.</i> <u>Activity 2 (15 minutes)</u> I. <i>In a columns, let learners discuss the various types of software and show how the types of software are related?</i>	<i>software is used to manage hardware and how they function as a platform for other software.</i> <u>Activity 2</u> I. <i>Mention various types of software in columns and show how the types are related in your notebooks</i>
Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
Level 1: 1. <i>What is a computer?</i> Level 2: 1. <i>The external and internal devices and equipment that enable you to perform major functions such as input, output, storage, communication, processing, and more is known as.....</i>	
Lesson Closure <i>In completing this part, refer to the Essential Questions to check that learning has taken place.</i>	
<u>Activity (5 minutes)</u> <i>Guide learners to recap their discussion and the points identified in the lesson. With the following as guiding questions;</i> a) <i>Describe software, hardware, and other computing features needed to create a document.</i> b) <i>Create, Edit and Format text and paragraphs using desktop/online computing tools</i>	
Lesson 2	
Focal Areas: 2. Computer software needed to create a document.	
<i>Teacher Activity</i>	<i>Learner Activity</i>
Starter <u>Activity (10 minutes)</u> <i>Brainstorming:</i> ▪ <i>It is the hardware part of the computer that makes the computer intelligent and not the software. True or False (understanding)</i>	
<u>Introductory activity (10 minutes)</u>	<u>Introductory activity</u>

I. <i>In small groupings (ability, language, background, gender, etc.) let learners List at least 10 hardware components and categorize them into input, processing, output and storage for large group discussion.</i> <u>Activity 1 (15 minutes)</u> I. <i>Show a relatively short video tutorial on how to create word document</i> <u>Activity 2 (15 minutes)</u> I. <i>Guide learners to use these hardware components to create newsletters and birthday card.</i>	I. <i>In small groupings, (ability, language, background, gender, etc.), state and classify 10 hardware components into input, processing, output and storage for large group discussion.</i> <u>Activity 1</u> I. <i>follow/watch a video to create word document</i> <u>Activity 2 (15 minutes)</u> I. <i>In groups, use the hardware components of the computer to create newsletter and birthday card</i>
Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
Level 4 1. <i>Enter twenty (20) words into a text editing software, using keyboard or any other input device.</i> 2. <i>(Learners should enter text (20 words) unaided – this should be their own original work or copied from given text).</i>	
Lesson Closure <i>In completing this part, refer to the Essential Questions to check that learning has taken place.</i>	
<u>Activity (10 minutes)</u> <i>Guide learners to recap their discussion and the points identified in the lesson. With the following as guiding questions:</i> a) <i>Enter twenty (20) words into a text editing software, using keyboard or any other input device.</i> b) <i>(Learners should enter text (20 words) unaided – this should be their own original work or copied from given text).</i>	
Reflection & Remarks	
Reflection <i>The brainstorming starter with the riddle engaged learners well and linked to real-life computer use. Practical identification of hardware was effective, but some learners struggled with abstract concepts like system software's role. Overall, objectives were met, with good participation too.</i>	

There was limited lab time for hands-on in Lesson 2

Remarks:

Strengthen practical hardware demo next time by bringing more peripherals. Extend discussion on ethical software use. Leson achieved effectively.

BAIDOO BONSOE SENIOR HIGH TECHNICAL SCHOOL
FORM ONE, SEMESTER ONE
FACILITATOR NAME: BAAH EZEKIEL

Learning Plan							
Subject	<i>Information & Communications Technology</i>	Week	2	Duration	<i>120 minutes</i>	Form	<i>1</i>
Strand	<i>ICTs in the Society</i>	Sub-Strand	<i>Organising, Managing and Presenting Information Using Essential Productivity Tools</i>				
Week Ending	21 st November 2025						
Content Standard	<i>Demonstrate knowledge and understanding of the use of various computing tools to create multimedia documents containing text, images, etc. e.g., birthday cards/Flyers for a specified purpose.</i>						
Learning Outcome(s)	<i>Create multimedia documents using appropriate computing tools</i>						
Learning Indicator(s)	<i>Create, edit and format text and paragraphs using Word or other word processing</i>						
Essential Question(s)	<i>What is the essence of a word processing application in the field of work</i> <i>How will the editing tools help one in his/her day-to-day task?</i> <i>What are the best approaches to teach editing in word processing application?</i> <i>In what way can cross cutting themes (GESI, SEL and national value) be integrated in the lesson?</i>						
Pedagogical Strategies	<i>Problem-Based Learning;</i> <i>Project-Based Learning;</i> <i>Talk for Learning;</i> <i>Experiential learning;</i> <i>Group work/collaborative learning.</i> <i>Small group and large group discussions,</i> <i>Think-pair-share,</i> <i>Questioning</i> <i>Demonstration</i> <i>Brainstorming</i>						

	<i>Brain writing</i>
Teaching & Learning Resources	<i>Pen</i> <i>Smartphone</i> <i>Mouse</i> <i>Laptop computers</i> <i>Desktop computer</i> <i>Productivity tools</i> <i>Subject based application software</i> <i>Instructional Laboratories (with multimedia equipment and smartboards)</i>

Key Notes on Differentiation

Learning Task:

- *Teacher should start the lesson grouping the learners taking into consideration GESI, SEL and other cross cutting issues and*
 - *Have them follow the video demonstration on how to create a word document to create their own*
 - *Demonstrate to them how to use editing tools (copy, cut, paste) to update their documents*
 - *Demonstrate how to use the reviewing tools (Grammar and spelling, synonyms checks) and let them brainstorm on the differences.*

Pedagogical exemplars:

- *Class: after an open discussion on what a word processor is, organize a brainstorming session on possible user/uses that could use a word processor. An example should be given to start the session, such as writing an essay for History class.*
- *Small group / pair: each group take at least three of previously identified uses of a word processor and list the hardware required. Then, feedback should be given to the class on the list they have compiled for each given use.*
- *Direct instruction: First outline the components of the home word processor screen, using the correct terminology such as tabs, and taskbar. Explain the basic file management, editing and reviewing tools in Word, breaking them down into manageable blocks for the learners.*
- *Practical session: task should relate to content from Week 1 that learners will type in the word documents*

Key Assessment:

- *DOK level 1:*
 - *Name a word processing document*
 - *Identify a ribbon on a screenshot of a Word Window*
- *DOK level 2:*
 - *Explain why it is important to save regularly when word processing a document?*
 - *Describe on tool in the Review tab in Word that you have used in a lesson and what you use it for.*
- *DOK level 3:*

○ Describe two different methods to change all occurrences of a misspelt word in a word document. Evaluate both methods in terms of speed and accuracy. • DOK Level 4: ○ Explore the features of this tool in Word. Explain what Editor tool can be used for	
Keywords	<i>Cut, Copy, Save, Save As, Edit, Find and Replace, Spelling and Grammar, Thesaurus, Delete</i>

--

Lesson 1 Basic file handling in Word: Creating a new document, saving a document, opening an existing document, printing a document. Main Lesson drawing on Concepts, Skills and Competencies to reinforce as in the Subject Teacher Manual	
<i>Teacher Activity</i>	<i>Learner Activity</i>
<u>Starter Activity (5 minutes)</u> <i>Each Students:</i> <i>Create a folder named 'ICT' with three subfolders: 'Computing System', 'Word', and 'PowerPoint' to save your work.</i>	
<u>Introductory Activity (10 minutes)</u> Class Discussion: Ask learner to think and try to explain the question “What is a word processor?” Brainstorming: Use of a Word Processor E.g. use to type an essay for history class <u>Activity 1 (10 minutes)</u> <i>Think-Pair-share:</i> <i>Let students take at least three previously identified uses of a word processor and list hardware required.</i> <u>Activity 2 (15 minutes)</u> <i>Direct Instruction:</i> <i>Launch a Word processor Window,</i> <i>Outline the components</i> <i>Explain the basic file management, editing, and reviewing tools in Word.</i> <i>Show a video that demonstrates how to use these tools (cut, copy, paste, find and</i>	<u>Introductory Activity</u> <i>What is a word processor?</i> <i>State the uses of a word processor</i> <u>Activity 1</u> <i>In pair, select at least three previously identified uses of the word processor and list the hardware required. Share your result with the class</i> <u>Activity 2</u> <i>Take note of the components of the Word processor Window.</i> <i>Identify and explain the use of some of the editing and reviewing tools</i> <i>Watch the video and take note on how to use the editing and reviewing tools</i>

replace, grammar and spelling check, thesaurus)	
<u>Activity 3 (15 minutes)</u> <i>Practical Session:</i> <i>Ask students to practice creating, editing, and reviewing by typing notes from the previous week's lessons on Computer hardware and software.</i> <i>Remind them to consistently save their work.</i>	<u>Activity 3</u> <i>Students practice creating, editing, and reviewing by typing notes from the previous week's lessons on Computer hardware and software.</i> <i>Remember to consistently save your work</i>
Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
Level 3 <i>Word process and save the Ten Green Bottles rhyme using the appropriate tools to speed up entry of text:</i> <i>Ten green bottles hanging on the wall,</i> <i>Ten green bottles hanging on the wall,</i> <i>And if one green bottle should accidentally fall,</i> <i>There'll be nine green bottles hanging on the wall.</i>	
Lesson Closure <i>In completing this part, refer to the Essential Questions to check that learning has taken place.</i>	
<u>Activity (5 minutes)</u> <i>Guide learners to recap their discussion and the points identified in the lesson. With the following as guiding questions.</i> <i>a) What is the keyboard shortcut for undoing the last operation when editing a Word document?</i> <i>b) Explain why it is important to save regularly when word processing a document.</i>	
Lesson 2 Basic editing tools in Word: Cut, Copy and Paste, Find and Replace Basic reviewing tools in Word: Spelling and Grammar checks, Thesaurus	
Main Lesson drawing on Concepts, Skills and Competencies to reinforce as in the Subject Teacher Manual	
<i>Teacher Activity</i>	<i>Learner Activity</i>
Starter <u>Activity (5 minutes)</u>	

Put four different topic images, phrases, or viewpoints in the corners of the classroom. Ask students to go to the corner that they relate to most. Once there, they should discuss with others in that corner why they agree with each other. Alternatively, put one person from each corner together to form groups of four.

Introductory activity (5 minutes)

Take learners through basic editing guidance.

Activity 1 (20 minutes)

Guide learners to practice a given task:

- 1. Open one of the files saved in Task 1 or a file given by your teacher.*
 - 2. Save regularly as you complete steps 3 to 9.*
 - 3. Using Cut and Paste, swap the first and last paragraph in the document.*
 - 4. Copy and Paste at least two paragraphs so that you will have some duplicate paragraphs.*
 - 5. Method 1 on page 18 to delete these duplicated paragraphs.*
 - 6. Copy two sentences from each paragraph to the end of the document.*
 - 7. Undo the steps completed for step 6.*
 - 8. Use the Find/Replace tool to find all occurrences of a word in the document and replace it with another word with a similar or same meaning.*
- Repeat step 8 but this time only replace the second and third occurrence of the found word.*

Introductory activity

Activity 1

Activity 2

Activity 3

Assessment DoK aligned to the Curriculum and Subject Teacher Manual

Level 3

- Describe two different methods to change all occurrences of a misspelt word in a Word document. Evaluate both methods in terms of speed and accuracy.*

Lesson Closure

In completing this part, refer to the Essential Questions to check that learning has taken place.

Activity (10 minutes)

- c) *Guide learners to recap what they have learnt on checking for misspelt and grammatical errors in word.*

Reflection & Remarks

Reflection:

Learners quickly grasped file management (Save/Save As) and enjoyed typing previous notes. Editing tools (Cut/Copy/Paste, Find/Replace) were mastered via practical tasks; reviewing (Spelling/Grammar) sparked discussion on clear communication.

Remarks:

Excellent progress on Learning Indicator.

Goals for the lesson was met and student showed active participation in the lesson.

Lesson was postponed to the following week because of the school's inter-houses sporting activities.

BAIDOO BONSOE SENIOR HIGH TECHNICAL SCHOOL
FORM ONE, SEMESTER ONE
FACILITATOR NAME: BAAH EZEKIEL

Learning Plan							
Subject	<i>Information & Communications Technology</i>	Week	3	Duration	<i>120 minutes</i>	Form	1
Strand	<i>ICTs in the Society</i>	Sub-Strand	<i>Organising, Managing and Presenting Information Using Essential Productivity Tools</i>				
Week Ending	28 th November 2025						
Content Standard	<i>Demonstrate knowledge and understanding of the use of various computing tools to create multimedia documents containing text, images, etc. e.g., birthday cards/Flyers for a specified purpose.</i>						
Learning Outcome(s)	<i>Create multimedia documents using appropriate computing tools</i>						
Learning Indicator(s)	<i>Create, edit and format text and paragraphs using Word or other word processing</i>						
Essential Question(s)	• <i>What roles does the formatting tools play the creating of multimedia document?</i> • <i>What is the best approach to teach the use of computing tools to responsibly create multimedia documents concerning text, images, and videos?</i> • <i>How will you feel after knowing how to use formatting tools to format documents?</i> • <i>In what way can cross cutting themes (GESI, SEL and national value) be integrated in the lesson?</i>						
Pedagogical Strategies	• Project-Based Learning; • Group work/collaborative learning. • Small group and large group discussions, • Think-pair-share, • Questioning, • Demonstration, • Brainstorming						

Teaching & Learning Resources	• Notepad or exercise book • Pen • Smartphone • Laptop computers • Projector • Productivity tools (Microsoft Office Word 2016) • Open Educational Resources (Including: YouTube, MOOCS-Udemy/ Coursera, khan academy, TESSA)
Key Notes on Differentiation	
<i>Learning Task:</i> Teacher should start the lesson, putting learners in groups considering cross-cutting issues like GESI, SEL and National values, and have open class discussion on formatting and identifying formatting tools. Teacher now guides learners through demonstration to perform the following task; • <i>Steps to apply font style, font color and font size to text</i> ○ <i>Select the text you want to emphasis,</i> ○ <i>Click B, I or U on the Home Ribbon</i> • <i>Step for using change case tools</i> ○ <i>Select the text</i> ○ <i>Click on the arrow beside the change case</i> ○ <i>Choose a desire case</i> • <i>How to use the format painter</i> ○ <i>Select text</i> ○ <i>On the Home tab, select format painter</i> ○ <i>Use the brush to paint over the desire text</i> ○ <i>Press esc on keyboard to deselect the painter</i> <i>Pedagogical Exemplar:</i> • <i>Mixed group ability discussion:</i> ○ <i>Each group should discuss on the term “formatting” and present their conclusion to the entire class.</i> • <i>Direct Instruction:</i> ○ <i>Display the Word window, and guide learner to identify the various tools in the Home Design Tab Ribbons, that they will use this week.</i> • <i>Teacher Demonstration: Show students how to apply font format such as font size, font style, font case and font color.</i> • <i>Practical Session:</i> ○ <i>Engage learners in practical session to create, save edit and format educational artefact (Certificate, Birthday Card, Greeting Card)</i>	

Key Assessment:

Teachers should assess learners during the learning process. Marks can be assigned to the presentations, contribution during work, research projects, and more

- *DOK Level 1:*
 - *What is the Keyboard shortcut for underline?*
- *DOK Level 2:*
 - *Describe what is meant by a watermark.*
- *DOK Level 3:*
 - *Create a step-by-step guide for how to add a watermark 'Draft' to a document.*
- *DOK Level 4:*
 - *Predict how advancements in augmented reality technology could revolutionize the way user create and interact with formatted text and paragraphs in a digital document.*

Keywords

Formatting, Ribbon, Tab, Font, Highlight, Select,

Lesson 1

Formatting tools: Changing font properties (colour, emphasis, capitalization)

Main Lesson drawing on Concepts, Skills and Competencies to reinforce as in the Subject Teacher Manual

Teacher Activity

Learner Activity

Starter Activity (10 minutes)

Have learners create a new word document, type the distinction of hardware and software, with a title, and save it.

Introductory Activity (15minutes)

Class Discussion:

In small group/large ask each group to discuss the following questions

- *have you use formatting tools before?*
- *What formatting tool did they use?*
- *What were they formatting?*
- *What is formatting?*

Activity 1 (10 minutes)

- *Display the Word window, and guide learner to identify the various tools in the Home, Insert and Design Tab Ribbons, that they will use this week.*

Introductory Activity

- *have you use formatting tools before?*
- *What formatting tool did they use?*
- *What were they formatting?*
- *What is formatting?*

Activity 1

- *identify the various tools in the Home, Tab Ribbons (font name, font style, font size, increase font, decrease font, font color, change case, format painter)*

Activity 2

<u>Activity 2 (20 minutes)</u> • <i>Video Demonstration: Play a video on how to apply font format such as font size, font style, font case and font color and ask learner to take notes.</i> <u>Activity 3 (50 minutes)</u> • <i>Project based learning: Engage learners in practical session to create, save edit and format educational artefact (Certificate, Birthday Card, Greeting Card) using the formatting tools they observed from the video</i>	Watch the video and take note on how to apply the following formatting tool Font style, font size, change case, and font color. <u>Activity 3</u> <i>Using text only, design a birthday card or any other seasonal greeting card for anyone.</i>
Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
1. <i>What is the keyboard shortcut for underline?</i> 2. <i>An essay is being word processed with the title ‘A brief history of Ghana’. Describe three types of formatting that could be applied to make this title more prominent.</i>	
Lesson Closure <i>In completing this part, refer to the Essential Questions to check that learning has taken place.</i>	
<u>Activity (15 minutes)</u> <i>Let learners recall what they’ve learnt on editing and formatting techniques, give examples and explain some of the steps in applying these formats.</i>	
Reflection & Remarks	
<i>Reflection:</i> <i>Direct instruction clarified font changes, tables, and insertions. Discussions on inclusive design and graphics insertion was exciting, but some struggled with file paths.</i> <i>Remarks:</i> <i>Learners showed active participation in class since it’s a practical session. All goals were met for the lesson and students showed much concern for their colleagues who needed help.</i>

BAIDOO BONSOE SENIOR HIGH TECHNICAL SCHOOL
FORM ONE, SEMESTER ONE
FACILITATOR NAME: BAAH EZEKIEL

Learning Plan							
Subject	<i>Information & Communications Technology</i>	Week	<i>4</i>	Duration	<i>120 minutes</i>	Form	<i>1</i>
Strand	<i>ICTs in the Society</i>	Sub-Strand	<i>Organising, Managing and Presenting Information Using Essential Productivity Tools</i>				
Week Ending	6 th December 2025						
Content Standard	<i>Demonstrate knowledge and understanding of the use of various computing tools to create multimedia documents containing text, images, etc. e.g., birthday cards/Flyers for a specified purpose.</i>						
Learning Outcome(s)	<i>Create multimedia documents using appropriate computing tools</i>						
Learning Indicator(s)	<i>Format the overall appearance of a page using Word or other word processing application.</i>						
Essential Question(s)	<i>What are the different page layout options</i> <i>What are the various text alignments and justification options.</i> <i>How do you insert watermark and background images</i> <i>In what way can cross cutting themes (GESI, SEL and national value) be integrated in the lesson?</i>						
Pedagogical Strategies	<i>Direct Instruction</i> <i>Project-Based Learning;</i> <i>Group work/collaborative learning.</i> <i>Questioning</i> <i>Demonstration</i> <i>Video-assisted learning</i> <i>Experiential Learning</i> <i>Questioning,</i> <i>Demonstration,</i>						

Teaching & Learning Resources	• Smartphones • Laptop computers • Desktop computers • Projector • Productivity tools (Microsoft Office Word 2016)
Key Notes on Differentiation	
<i>Learning Tasks:</i> <i>Teacher should start the lesson by putting learners in groups considering cross-cutting issues like mixed-group abilities, GESI, SEL and National values and guide them on the following tasks:</i> A. How to adjust the page setup settings-orientation, columns and margins 1. <i>Select the appropriate button from Page Setup group in the Layout tab.</i> 2. <i>For orientation, select Landscape or keep it as portrait.</i> 3. <i>For Columns: the content of a page or a paragraph (highlight the paragraph first) can be presented in columns by selecting the required number of columns.</i> 4. <i>Many of the page settings can also be made via the Page Setup dialog box which will be displayed by clicking on the arrow in the bottom right-hand side of the Page Setup group.</i> 5. <i>Clicking on Layout>Borders and Shading dialog box from where you can apply a page border of different style and thickness, and a color shading to the document paragraph. Selecting the paragraph in advance will apply the border settings to that paragraph only.</i> 6. <i>To apply page border, go to Design>Page Borders and select the style, color, etc. of the border.</i> 7. <i>To insert a page break, go to Layout>Breaks>Page</i> 8. <i>Or use the keyboard shortcut (Ctrl+ Enter), Shift+ Enter for Mac</i> 9. <i>You can also apply pagination settings from the Paragraph dialog box so that headings and paragraphs behave the way you want them to.</i> B. How to add a header and a footer 1. <i>Select header and a footer from the insert tab</i> 2. <i>Select Edit Header or Edit Footer</i> 3. <i>The Header and Footer tab appears,</i> 4. <i>and by default, the curser is in the center section of the header/footer.</i> 5. <i>Type the text you want in the header/footer.</i> 6. <i>More options such as inserting page numbers can be set in the Header & footer tab.</i> 7. <i>Select close Header and Footer when finished.</i> C. How to set paragraph alignment 1. <i>Select the home tab</i> 2. <i>Select the text alignments by either using the alignment buttons in the Paragraph grouping or use the keyboard shortcuts:</i> • <i>To align the text left, (Ctrl +L)</i> • <i>To align the text right,(Ctrl +R)</i> • <i>To center the text, (Ctrl +E)</i>	

- To fully justify text, (Ctrl+J)

Cmd instead of Ctrl if using a Mac

D. How to set spacing between lines

1. Use the Line and Paragraph spacing tool or select the Paragraph dialogue box from the Home tab – see Figure 4.12 and Figure 4.13.
2. Set the distance between lines within paragraphs to meet your requirements

E. How to indent lines in one paragraph/ at the start of every paragraph.

Line

1. Place the cursor at the start of the line you want to indent.
2. Click on the Increase Indent button. Note that there is also a Decrease Indent button.

Paragraph(s)

3. Select the paragraph or multiple paragraphs that you want to indent.
4. Go to the Paragraph group in the Home tab.
5. Open the Paragraph dialogue box to set the type of indent

OR

6. Drag the indent shapes on the ruler which is situated below the ribbon

Pedagogical exemplars:

- *Small group / pair: each group insert a text watermark and then project the result to the class.*
- *Direct instruction: using a projector demonstrate page layout settings.*
- *Experiential Learning: In small groups, learners are guided by giving ‘Steps of Task 1 printed on paper’ to explore the creation of and adjusting page setup margins.*

Key Assessment:

DOK level 1:

1. Complete the sentence: Text inserted in the bottom margin of every page of a document is called a _____.

DOK level 2:

2. Describe what is meant by the term ‘justified text’. Use a drawing/diagram to support your description

DOK level 3:

3. What problem may arise when printing in Word if the document’s page margins are too narrow?

DOK Level 4:

4. Suggest reasons to support the following statements:

- *The use of word processors in the newspaper industry was transformative.*

• Many newspapers are moving from print to digital publishing or trying to drive more revenue from their digital platforms. b. Using the internet as a research tool, create a case study of a Ghanaian newspaper and how they have adapted to fit the digital age.	
Keywords	Header, footer, change capitalization, orientation, column, margin, Orphan Control, checkbox, page break, Layout, alignment, dialog box, Indent

Lesson 1

Basic layout tools for lines, paragraphs and pages in Word, including page layout, alignment, headers and footers, and page columns	
Main Lesson drawing on Concepts, Skills and Competencies to reinforce as in the Subject Teacher Manual	
<i>Teacher Activity</i>	<i>Learner Activity</i>
Starter <u>Activity (10 minutes)</u> <i>Have learners create a new word document, type their top 10 favorite Ghanaian artists, format it to look visually appealing and save it as ‘Ghanaian Artists’.</i>	
<u>Introductory Activity (5minutes)</u> <i>In small mixed ability group, let learner list hardware devices and software applications.</i> <u>Activity 1 (15 minutes)</u> <i>Ask learner take note and observe the following activities:</i> <i>How to adjust the page setup settings-orientation, column, and margins.</i> <i>How to add a header and a footer</i> <u>Activity 2 (20 minutes)</u> <i>Video Demonstration: Play a video on how to:</i> <i>How to adjust the page setup settings-orientation, column, and margins.</i> <i>How to add a header and a footer</i> <u>Activity 3 (10 minutes)</u>	<u>Introductory Activity</u> <i>List five software applications</i> <u>Activity 1</u> <i>Observe the demonstration and practice.</i> <u>Activity 2</u> <i>Watch teacher demonstration and take note on how to:</i> <i>How to adjust the page setup settings-orientation, column, and margins.</i> <i>How to add a header and a footer</i> <u>Activity 3</u>

<i>In small groups, guide learners to explore the creation and adjusting page setup settings using the following steps:</i> <i>1. Open a Word document that you have saved earlier, or a file given to you by your teacher. This Word document should have at least 4 pages.</i> <i>2. Save this file with a different file name. Click on Save or keyboard shortcut (Ctrl + S) to effect changes as you work through steps 3 to 9.</i> <i>3. Add 'Practicing Word Tools' as a header, and your name and page number as a footer.</i> <i>4. Change the top and bottom page margins to 3cm and the left and right margins to 2cm.</i> <i>5. Insert a page break at the end of the last page and copy and paste some text to populate the blank page that results.</i> <i>6. Select the first paragraph of the first page and change the format from one to three columns.</i> <i>7. Change the format of another paragraph (you choose which one) to two columns.</i> <i>8. Change the page orientation to landscape for the whole document.</i> <i>9. Add a 3pt black line border to one of the single column paragraphs in the document</i>	<i>Explore the creation and adjusting page setup settings using the following steps:</i> <i>1. Open a Word document that you have saved earlier, or a file given to you by your teacher. This Word document should have at least 4 pages.</i> <i>2. Save this file with a different file name. Click on Save or keyboard shortcut (Ctrl + S) to effect changes as you work through steps 3 to 9.</i> <i>3. Add 'practicing Word Tools' as a header, and your name and page number as a footer.</i> <i>4. Change the top and bottom page margins to 3cm and the left and right margins to 2cm.</i> <i>5. Insert a page break at the end of the last page and copy and paste some text to populate the blank page that results.</i> <i>6. Select the first paragraph of the first page and change the format from one to three columns.</i> <i>7. Change the format of another paragraph (you choose which one) to two columns.</i> <i>8. Change the page orientation to landscape for the whole document.</i> <i>9. Add a 3pt black line border to one of the single column paragraphs in the document</i>
Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
<i>Level 1</i>	

1. Complete the sentence: Text inserted in the bottom margin of every page of a document is called a _____

Level 2

2. Describe what is meant by the term 'justified text'. Use a drawing/diagram to support your description.

Lesson Closure

In completing this part, refer to the Essential Questions to check that learning has taken place.

Activity (5 minutes)

Guide learners to recap the discussions on the lesson.

1. How do you apply a margin to a page?

Lesson 2

Basic layout tools for lines, paragraphs and pages in Word, including page layout, alignment, headers and footers, and page columns

Main Lesson drawing on Concepts, Skills and Competencies to reinforce as in the Subject Teacher Manual

Teacher Activity

Learner Activity

Starter Activity (10 minutes)

Learners write down how to apply a header and a footer in their notebooks. Learners then exchange their books and mark.

Introductory activity (25 minutes)

Class Discussion: Ask learners to think describe the various text alignments and how they are displayed.

Activity 1 (30 minutes)

Ask learner take note and observe the following activities:

1. How to set paragraph alignment
2. How to set a spacing between lines
3. How to indent lines in one paragraph/ at the start of every paragraph.

Activity 2 (30 minutes)

In small groups let learners generate paragraphs in MS word and apply the following paragraph formatting:

Introductory activity

Describe the various text alignments and how they are displayed.

Activity 1

Observe the demonstration and practice.

Activity 2

1. Paragraph alignment 2. Indent lines in one paragraph at the start of every paragraph 3. Set spacing between lines	<i>In small groups learners generate paragraphs in MS word and apply the following paragraph formatting:</i> 1. Paragraph alignment 2. Indent lines in one paragraph at the start of every paragraph 3. Set spacing between lines
--	--

Assessment DoK aligned to the Curriculum and Subject Teacher Manual

Level 3

Open a given document with a confused layout. Format the document to make it more readable and professional looking.

Lesson Closure

In completing this part, refer to the Essential Questions to check that learning has taken place.

Activity (15 minutes)

Guide learners to recap the discussions on the lesson.

1. How do you indent lines in a paragraph?
2. What are the various text alignment in Ms. Word.

Reflection & Remarks

Reflections:

Starter recap reinforced prior knowledge. Step-by-step exploration of margins, orientation, and headers was effective; multi-page task challenged higher learners positively. Alignment/indent discussions linked to professional documents.

Remarks:

Goals for the lesson was met.

BAIDOO BONSOE SENIOR HIGH TECHNICAL SCHOOL
FORM ONE, SEMESTER ONE
FACILITATOR NAME: BAAH EZEKIEL

Learning Plan							
Subject	<i>Information & Communications Technology</i>	Week	5	Duration	<i>120 minutes</i>	Form	<i>1</i>
Strand	<i>ICTs in the Society</i>	Sub-Strand	<i>Organising, Managing and Presenting Information Using Essential Productivity Tools</i>				
Week Ending	12 th December 2025						
Content Standard	<i>Demonstrate knowledge and understanding of the use of various computing tools to create multimedia documents containing text, images, etc. e.g., birthday cards/Flyers for a specified purpose.</i>						
Learning Outcome(s)	<i>Create multimedia documents using appropriate computing tools</i>						
Learning Indicator(s)	<i>Enhance lists by sorting, renumbering and customizing list styles using desktop / online computing tools</i>						
Essential Question(s)	<i>What roles does the formatting tools play in the creating of multimedia document?</i> <i>What is the best approach to teach the use of computing tools to responsibly create multimedia documents concerning text, images, and videos?</i> <i>What is the feeling after knowing how to use computing tools to a multimedia document?</i> <i>In what way can cross cutting themes (GESI, SEL and national value) be integrated in the lesson?</i>						
Pedagogical Strategies	<i>Direct Instruction</i> <i>Project-Based Learning.</i> <i>Think-pair-share</i> <i>Group work/collaborative learning.</i> <i>Questioning</i> <i>Demonstration</i> <i>Video-assisted learning</i> <i>Experiential Learning</i>						
Teaching & Learning Resources	<i>Smartphones</i> <i>Laptop computers</i> <i>Desktop computers</i> <i>Projector</i> <i>Tablets</i> <i>Productivity tools (Microsoft Office Word 2016)</i> <i>Open Educational Resources (Including: YouTube, MOOCS-Udemy/ Coursera, khan academy, TESSA)</i>						
Key Notes on Differentiation							

Learning Tasks:

Teacher should start the lesson by putting learners in groups considering cross-cutting issues like mixed-group abilities, GESI, SEL and National values and guide them on the following tasks:

- **Steps for creating a bulleted or numbered list**

1. Position the cursor where you want to insert the bullet list.
2. On the Home tab, under paragraph grouping, click the Bullets button to display the bullet library
3. Choose a desired bullet or numbering list.
4. Type any text and press Enter key between item to create the desired list.
5. Press Enter key on the keyboard twice to deactivate the selected bullet / numbering.

- **Step for creating a multilevel list**

1. Type out the lines of your list, with each item of your list on a different line.
2. In the Paragraph group on the Home tab, click the Multilevel List button.
3. Choose a list type from the List Library.
4. Your list will now be formatted in the style you chose but only as in a single-level list
5. On the Home tab, under Paragraph grouping, click the item to a lower list level
6. Click the Decreased Indent button on the list item to demote it back to the first level list.

- **How to sort a text/number list**

1. Select the list you want to sort
2. Go to Home tab, Sort button
3. In the Sort Text dialogue box set Sort by to Paragraphs and Text
4. Choose Ascending or Descending
5. Select Ok

- **How to customize a list style such as defining a new bullet**

1. Select the text or bullet you want to change
2. On the Home tab, in the Paragraph group, click the arrow next

Pedagogical Exemplars:

- Think-pair-share: Using mixed ability plus mixed gender group, learner list hardware devices and software applications. Explain list and give types of list (bullet or numbering).
- Demonstration: while still in groups, teacher demonstrate how to create bullet and numbering lists.
- Video-assisted learning: To cater for those who have difficulties in following the demonstration, a video on how to create bullet and number (both single and multilevel list) will be shown to the class.
- Experiential Learning: In small groups, learners are guided by giving 'Steps of Task 1 printed on paper' to explore the creation of and editing of bullets and numbering

Key Assessment:

Teachers should assess learners during the learning process. Marks can be assigned to the presentations, contribution during work, research projects, and more

DOK Level 1:

A numbered list is (a) an ordered list (b) an unordered list

DOK Level 2:

- Define a new picture bullet suitable for use with a list of names of players in Ghana Black Star football team

DOK Level 3: - A cook is word processing a Favorite recipe and is considering which type of list to use for the set of instructions. State which type of list that you think would be best used in this situation. Justify your decision. DOK Level 4: - Investigate the function of the Layout tool. Use your finding to explain the difference between Word Style and Word theme	
Keywords	List, Bullet, Numberings, ordered list, Unordered List, List Styles, Sorting, Ascending, Descending, multilevel list

Lesson 1

Creating lists – Bulleted, numbered, multilevel Editing lists - Sorting and renumbering a list	
Main Lesson drawing on Concepts, Skills and Competencies to reinforce as in the Subject Teacher Manual	
<i>Teacher Activity</i>	<i>Learner Activity</i>
<u>Starter Activity (5 minutes)</u> Have learners create a new word document, generate five paragraph document add header and a footer.	
<u>Introductory Activity (10minutes)</u> <i>In small of mixed ability plus mixed ability groups, let learners list hardware devices and software applications.</i> <i>Ask learners to explain the term ‘list’ and identify the types of lists</i> <u>Activity 1 (20 minutes)</u> <i>Let learner take notes as you demonstrate the followings:</i> - Steps for creating a bulleted or numbered list - Step for creating a multilevel list - How to sort a text/number list - How to customize a list style such as defining a new bullet	<u>Introductory Activity</u> <i>In groups (Think-pair-Share):</i> <i>List the 10 hardware devices and 10 software applications</i> <i>Explain the term ‘List’ and identify its types</i> <u>Activity 1</u> <i>Learners observe the demonstration and practice</i>

Activity 2 (10 minutes)

Show a video on the following steps

- *Steps for creating a bulleted or numbered list*
- *Step for creating a multilevel list*
- *How to sort a text/number list*
- *How to customize a list style such as defining a new bullet*

To cater for those who have difficulties in following the demonstration.

Activity 3 (10Minutes)

- *In small groups, guide learners to explore the creation and editing of bullets and numbering using the following steps:*
 1. *Create a new document in Word.*
 2. *Save this document using the filename 'Software'. Click on Save to effect the changes as you work through step 3 to 5*
 3. *Add your name and page number as a footer*
 4. *Create two lists:*
 - *A bulleted list of three types of systems software*
 - *A numbered List of the names of at least three examples of application software*
 5. *Add some pictures to your document to match your chosen software*

Activity 2

Watch the video and practice

Activity 3

- *Explore the creation and editing of bullets and numbering using the following steps:*
 1. *Create a new document in Word.*
 2. *Save this document using the filename 'Software'. Click on Save to effect the changes as you work through step 3 to 5*
 3. *Add your name and page number as a footer*
 4. *Create two lists:*
 - *A bulleted list of three types of systems software*
 - *A numbered List of the names of at least three examples of application software*
 5. *Add some pictures to your document to match your chosen software.*

Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
• <i>A numbered list is</i> <i>(a) an ordered list</i> <i>(b) an unordered list</i> • <i>Define a new picture bullet suitable for use with a list of names of players in Ghana Black Star football team</i>	
Lesson Closure <i>In completing this part, refer to the Essential Questions to check that learning has taken place.</i>	
<u>Activity (5 minutes)</u> Guide learners to recap their discussion, points identified and steps in the lesson. 1. <i>Explain what a list is and state its types</i> <i>Create, edit, customize and sort a list</i>	
Lesson 2	
Main Lesson drawing on Concepts, Skills and Competencies to reinforce as in the Subject Teacher Manual	
<i>Teacher Activity</i>	<i>Learner Activity</i>
<u>Starter Activity (5 minutes)</u> Give an ice breaker on creating lists items. Learners listen and respond by giving out the steps involved in creating a list.	
<u>Introductory activity (20 minutes)</u> Task learners to brainstorm a. <i>Create, edit, customize and sort a list.</i> b. <i>Explain the term styles in MS Word.</i> <i>Hint</i> 1. <i>Ensure all learners irrespective of ability or participate in activity.</i> <u>Activity 1 (15 minutes)</u> Let learner take notes as you demonstrate the followings: 1. <i>How to apply a Word style</i> 2. <i>How to apply a style set to your document</i>	<u>Introductory activity</u> a. <i>Create, edit, customize and sort a list</i> b. <i>Explains the term styles in MS Word</i> <u>Activity 1</u> Observe and take note on: 1. <i>How to apply a Word style</i> 2. <i>How to apply a style set to your document</i> 3. <i>How to generate a table of contents from heading styles</i>

3. How to generate a table of contents from heading styles

Activity 2 (15 minutes)

In small groups guide learners to perform the following activity

1. Open a previous Word file that consists of more than four pages, or open a file given by your teacher.
2. Save this document using the file name 'Styles Testing'. Click on Save or use the keyboard shortcut (Ctrl + S) to effect changes as you work through steps 3 to 8.
3. Apply a mixture of Heading 1, 2, and 3 styles to existing heading text. Insert some new headings across all the pages.
4. Insert page numbers in the document if this has not been done previously.
5. Generate a ToC.
6. Insert two new pages and add some new heading text to these pages, random text is fine.
7. Apply styles to the new headings.
8. Update the ToC

Activity 3 (15 minutes)

In small mixed ability group guide students to:

1. Open a Word file from your ICT folder or a file given by your teacher.
2. Save this document using the file name 'Styles Set Testing'. Click on Save or use the keyboard shortcut (Ctrl + S) to effect changes as you work through steps 3 and 4.
3. Apply some different styles to your document text from the Styles drop-down menu.

Activity 2

1. Open a previous Word file that consists of more than four pages, or open a file given by your teacher.
2. Save document using the file name 'Styles Testing'. Click on Save or use the keyboard shortcut (Ctrl + S) to effect changes as you work through steps 3 to 8.
3. Apply a mixture of Heading 1, 2, and 3 styles to existing heading text. Insert some new headings across all the pages.
4. Insert page numbers in the document if this has not been done previously.
5. Generate a ToC.
6. Insert two new pages and add some new heading text to these pages, random text is fine.
7. Apply styles to the new headings.
8. Update the ToC

Activity 3

In small mixed ability grouping perform the following activities.

1. Open a Word file from your ICT folder or a file given by your teacher.
2. Save this document using the file name 'Styles Set Testing'. Click on Save or use the keyboard shortcut (Ctrl + S) to effect changes as you work through steps 3 and 4.
3. Apply some different styles to your document text from the Styles drop-down menu

4. Go to the Design tab and try out different Style Sets.	4. Go to the Design tab and try out different Style Sets
Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
Level 3 <i>What type of page orientation would be best suited to a three-column brochure? Justify your choice of orientation.</i>	
Lesson Closure <i>In completing this part, refer to the Essential Questions to check that learning has taken place.</i>	
<u>Activity (5 minutes)</u> <i>Guide learners to recap their discussion and the points identified in the lesson.</i> <i>Describe two advantages of using the Word styles tool for formatting headings in a document over manually setting the formatting for each individual heading</i>	
Reflection & Remarks	
Reflection: <i>Sorting/renumbering practiced effectively in 'Software' doc. Multilevel lists challenged but built critical thinking.</i> Remarks: <i>Lesson goals were met.</i>

BAIDOO BONSOE SENIOR HIGH TECHNICAL SCHOOL
FORM ONE, SEMESTER ONE
FACILITATOR NAME: BAAH EZEKIEL

Learning Plan							
Subject	<i>Information & Communications Technology</i>	Week	6	Duration	<i>120 minutes</i>	Form	<i>1</i>
Strand	<i>ICTs in the Society</i>	Sub-Strand	<i>Organising, Managing and Presenting Information Using Essential Productivity Tools</i>				
Week Ending	6 th December 2025						
Content Standard	<i>Demonstrate knowledge and understanding of the use of various computing tools to create multimedia documents containing text, images, etc. e.g., birthday cards/Flyers for a specified purpose.</i>						
Learning Outcome(s)	<i>Create multimedia documents using appropriate computing tools</i>						
Learning Indicator(s)	<i>Create, edit and format text and images in PowerPoint using keyboard and mouse.</i>						
Essential Question(s)	<i>1. How can images be moved to a different spot on the slide in PowerPoint?</i> <i>2. What will make my presentation look professional and polished in PowerPoint?</i> <i>3. What keyboard shortcuts will make my text bigger or smaller in PowerPoint?</i> <i>4. What are the best ways to rotate and flip images using the mouse in PowerPoint?</i> <i>5. In which ways can I integrate the cross-cutting themes-21st Century, GESI, SEL, and National values in teaching PowerPoint.</i>						
Pedagogical Strategies	<i>Demonstration</i> <i>Project-based learning</i> <i>Experiential learning</i> <i>Learner-led presentations</i> <i>Practical sessions</i> <i>Direct instruction</i>						
Teaching & Learning Resources	<i>Notepad or exercise book</i> <i>Pen</i> <i>Smartphones</i> <i>Laptop computers</i> <i>Desktop computers</i> <i>Projector</i>						

Key Notes on Differentiation

i. Learning Task:

Teacher should start the lesson by putting learners in groups considering cross-cutting issues like mixed-group abilities, GESI, SEL and National values and guide them on the following tasks:

A. How to launch Microsoft PowerPoint, create and save a new presentation

- 1. Click on the Start icon.*
- 2. Type PowerPoint in the search bar and click on the Microsoft PowerPoint app that appears in the search result.*
- 3. Click Blank presentation to open a new blank presentation window*
 - a. Click on Save As command (or Save a Copy if using PowerPoint 365)*
 - b. Make necessary changes in the Save As dialogue box.*
 - c. Click Save.*
 - d. Add content to the title and subtitle on in the slide pane by first clicking on the placeholders.*
 - e. Add more slides if required (see instruction set B).*
 - f. Click on Save regularly to update the content of the last stored file.*
 - g. Click on the X in the top right-hand corner of the PowerPoint window or select File > Close.*

B. How to insert a new slide

- 1. Select the slide you want your new slide to follow.*
- 2. Select Home > New Slide – see Figure 6.7.*
- 3. Select a slide layout.*
- 4. If Blank is selected, the user will have to insert a textbox to enter text.*
- 5. Click on the placeholder and enter the content.*
- 6. This is the slide layout you will need for most of the tasks in this manual:*

C. How to delete a single slide

- 1. Right-click the slide in the thumbnail pane/list on the left.*
- 2. Select Delete Slide.*

D. How to open an existing slideshow for editing

- 1. Click on the File Explorer icon. []*
- 2. Go to the folder location where your file is stored.*
- 3. Open the document you wish to edit by double-clicking on it.*

From within PowerPoint, the steps would be:

- 1. Click the File tab.*
- 2. Click Open. The Open screen appears, select/browse a location, and select file you want to open*

ii. Pedagogical Exemplars:

Direct instruction: Use screenshots or projections of the PowerPoint Home ribbon and other targeted ribbons to identify the various tools/buttons for learners. Break down the content into manageable blocks for the learners. Using the projector, demonstrate how to use the skills

given in the three focal areas. Repeat with similar demonstrations if necessary to consolidate learners' understanding. Invite directions from the learners on the steps to follow during the second or subsequent demonstration(s).

ii. *Practical sessions and Project-based learning:* Engage in practical sessions and project-based learning to create a slideshow using presentation software. Have several similar tasks (increasing in complexity, if possible) for the practice of each tool/set of tools.

Using experiential learning: In small groups, practically guide learners to explore the focal areas such as how to create and play a basic presentation consisting of text and graphics. Learners could be encouraged to explore other PowerPoint tools. The more competent IT users could be challenged to work out how to insert hyperlinks, video and sound into their presentation.

Learner-led presentations: When a learner or group has produced an interesting or high-quality presentation, allow him/her/them to present their slideshow to the class, followed by a Question & Answer session about the computing tools employed.

iii. *Key Assessments (DoK):*

Level 1

1. PowerPoint can be used to create a multimedia document. List at least two types of media that can be inserted into a PowerPoint slide

Level 2

2. Create a four-slide presentation from a given storyboard

3. Explain the process of inserting a 'Title' slide into a presentation

Keywords	PowerPoint, presentation, Insert, slides, graphics, template, slideshow, animation, transition, window
-----------------	--

Lesson 1

1. Basic file handling in PowerPoint: creating a new presentation, saving a presentation, opening an existing presentation, and printing a presentation.

Main Lesson drawing on Concepts, Skills, and Competencies to reinforce as in the Subject Teacher Manual

Teacher Activity

Learner Activity

Starter Activity (5 minutes)

Using rise and fall definition games, let students pick the right answers for the keywords. Guide learners brainstorm and come out with the definition of PowerPoint.

Introductory Activity (10minutes)

Introductory Activity

<i>Direct instruction: Project PowerPoint Home ribbon and other targeted ribbons for learners to identify.</i> <i>Hint</i> <i>a. Break down the content into manageable blocks for the learners.</i> <i>b. Invite directions from the learners on the steps to follow during the second or subsequent demonstration(s).</i> <u>Activity 1 (20 minutes)</u> <i>In mixed ability groups engage learners in practical sessions and project-based learning on how to:</i> <i>1. launch Microsoft PowerPoint, create and save a new presentation</i> <i>2. insert a new slide</i> <i>3. delete a single slide</i> <i>4. print from PowerPoint</i> <u>Activity 2 (20 minutes)</u> <i>In small groups, let learners practice the following task</i> <i>1. Create a new presentation and save it using the file name 'Myself'</i> <i>2. Add the text 'All About Me' as the title and your own name as the subtitle.</i> <i>3. Use the tools from the Font group (Home tab) to format the entered text as you wish.</i> <i>4. Save your updated document.</i>	<i>Pay attention and identify PowerPoint ribbon and other targeted ribbon.</i> <u>Activity 1</u> <i>Practice how to:</i> <i>1. launch Microsoft PowerPoint, create and save a new presentation</i> <i>2. insert a new slide</i> <i>3. delete a single slide</i> <i>4. print from PowerPoint</i> <u>Activity 2</u> <i>In small groups, practice the following task</i> <i>1. Create a new presentation and save it using the file name 'Myself'</i> <i>2. Add the text 'All About Me' as the title and your own name as the subtitle.</i> <i>3. Use the tools from the Font group (Home tab) to format the entered text as you wish.</i> <i>4. Save your updated document.</i>
Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
Level 3 Create a concept map of the topics covered in Section 1 of the SHS 1 ICT course.	
Lesson Closure <i>In completing this part, refer to the Essential Questions to check that learning has taken place.</i> <u>Activity (15 minutes)</u> <i>a. Ask learners to share what they learned from the lesson with the whole class. (offer learners the opportunity to ask questions for further clarification and address misconceptions.</i> <i>b. Assign an activity for the next lesson</i>	

Reflection & Remarks	
Reflection: - Limited laptops caused some groups to wait longer than expected, and a few learners struggled with inserting and resizing images or applying design templates smoothly. - High-proficiency learners helped others with keyboard shortcuts and formatting, promoting respect for others' ideas during presentation. Remarks: Learners made good progress toward the Learning Indicator (creating, editing, and formatting text and images in PowerPoint).	
Lesson 2 2. Inserting new slides, text, and graphics 3. Applying a design template to slides 4. Playing a slideshow	
Main Lesson drawing on Concepts, Skills, and Competencies to reinforce as in the Subject Teacher Manual	
Teacher Activity	Learner Activity
Starter <u>Activity (5 minutes)</u> Ask learners to use the first letter of their Surname to produce a keyword in PowerPoint. Encourage individual students to engage in the activity.	
<u>Introductory activity (20minutes)</u> Present videos and demonstrations on: - How to print from PowerPoint - How to play a PowerPoint slideshow - How to apply a design template - How to add basic shapes to a slide <u>Activity 1 (20 minutes)</u> In small groups, practically guide learners to explore task 2 - Open the file saved in Task 1 (Myself.pptx). - Insert a Text and Content slide. - Enter 'My Family' as the title, and enter some details about your family in the content area. - Add at least four additional slides about yourself, leaving room for pictures that you will be adding later. Three of these titles should be: - My Favorite Things - My School - My Hopes for The Future	<u>Introductory activity</u> Watch and take down notes on demonstration on: - How to print from PowerPoint - How to play a PowerPoint slideshow - How to apply a design template - How to add basic shapes to a slide <u>Activity 1</u> Explore task 2 - Open the file saved in Task 1 (Myself.pptx). - Insert a Text and Content slide. - Enter 'My Family' as the title and enter some details about your family in the content area. - Add at least four additional slides about yourself, leaving room for pictures that you will be adding later. Three of these titles should be: - My Favorite Things

5. <i>Format your text to make it more visually appealing.</i> 6. <i>Play you slideshow and check for errors.</i> 7. <i>You may wish to experiment with adding transitions and animation to your slideshow:</i> • <i>Slide transitions are the animation-like effects that happen when you move from one slide to the next during a presentation. Experiment with the options given in the Transition tab.</i> • <i>Animation or movement on a slide can be used to draw the audience’s attention to specific content or to make the slide easier to read. In PowerPoint, you can animate text and objects like clip art, shapes, and pictures. Select the object to be animated and experiment with the options given in the Animations tab.</i> 8. <i>Save your updated document</i> <u>Activity 2 (5 minutes)</u> <i>Give learner or group that has produced an interesting or high-quality presentation, the opportunity to present their slideshow to the class.</i> <i>Hint</i> <i>Encourage learners to ask Question about the computing tools employed.</i> <u>Activity 3(5minutes)</u> <i>Together with learners summarize the focal areas</i>	• <i>My School</i> • <i>My Hopes for The Future</i> 5. <i>Format your text to make it more visually appealing.</i> 6. <i>Play you slideshow and check for errors.</i> 7. <i>You may wish to experiment with adding transitions and animation to your slideshow:</i> 8. <i>Save your updated document</i> <u>Activity 2</u> <i>Present their slideshow to the class.</i> <u>Activity 3</u> <i>Listen and put down notes</i>
Assessment DoK aligned to the Curriculum and Subject Teacher Manual	
Level 3 <i>Evaluate the impact of the placement of photos to complement textual content on audience engagement.</i>	
Lesson Closure <i>In completing this part, refer to the Essential Questions to check that learning has taken place.</i>	

Activity (5 minutes)

Ask learners to summarize the keywords (PowerPoint, presentation, slides, template, slideshow, animation, transition,) in their own words

Reflection & Remarks

Reflection:

- *Most learners successfully launched PowerPoint, created and saved presentations, inserted new slides/text/graphics, and played their slideshows without major issues. Mixed-ability and mixed-gender groups worked effectively.*

Remarks:

Learners made good progress toward the Learning Indicator (creating, editing, and formatting text and images in PowerPoint).
